

“Watch it Grow” - Year 2 Science Unit

Dear Parents/Carers,

During this term year 2 students are learning about how living things grow and change. As a part of this unit, students will be looking at their own growth and changes from when they were a babies.

To help with this students are asked, if possible, to bring to school a photo taken when they were a baby. It is important that you only send in copies of photos as students will be using them in an activity.

Those students, who for various reasons are not able to bring in photos, may like to discuss what they looked like with you and bring a drawing of themselves as a baby.

Students are asked to bring their baby photo or drawing to school by **Friday 1 June, Week 5**.

Kind regards,

Sharee Hodge, Evelyn Robertson, Melissah Cook and Ilse Arellano
