

Sustainability

Make a list of the many *different kinds* of recyclable things are put *into the yellow wheelie bin* at home?

Use the headings below:

- A. Glass
- B. Metal
- C. Paper/cardboard
- D. Plastic
- E. Soft plastic (i.e. with a REDCYCLE sign)
- F. Compost

Are there any of these things useful for making:

- a) Temporary toys or art works or without glue, sticky tape, or staples?

Can you take a photo and send it to Ms Dillon?

- b) Well-constructed toys or art works or using glue, sticky tape, staples or other ?

Can you take a photo and send it to Ms Dillon?

1. How many light switches and power points do you have in your home?
Having the power point on for appliances like toasters, televisions etc can still use up electricity while they're turned off if the power point switch is on.
2. Make a list of how many light switches and the number of power points can be switched off whilst not being used?
3. How many days in a row can you keep these light switches and the power points off to save electricity?
4. Ask an adult at home to compare the usage and cost of newest electricity bill with the last one.
